## Choose the right disc for each throw

We have a disc for every shot. Choose wisely. Keep your Drivers in the bag when you get within a certain range.

Drivers are meant to be thrown fast and far and do not perform as well when thrown at low speeds like a Putt & Approach. Pull out the Putter or Mid-Range to make a key placement throw or putt. It's just like ball golf club selection. Play smart. Have fun.

**Distance Drivers** are the best choice for the longest drives and will maximize your distance.

**Fairway Drivers** are great for shots that you want to be accurate and still get close to the target.

**Mid-Range** discs offer excellent speed and pin-point control at moderate speeds.

**Putt & Approach** discs are key for short range success. They are the most predictable at lower speeds.

## DISTANCE DRIVERS

**Get FREE Disc Selection Charts**  
We'll send you a free set of Disc Selection Charts to inform you and your customers.

They have all the molds, plastics offered, flight paths, and flight numbers so players are better informed about the disc they are choosing.

Just call your sales rep and ask for a set of Disc Selection Charts and we'll send a set your way.
