

Innova Driver Selection Chart

Let us help you choose the disc that is right for you.

SPEED 10		10 3 0 5		10 4 -1 3		10 5 -1 2		10 4 -2 3
	Monster The Monster is our most stable, powerful, wind beating distance driver. It is made for people who can turn over other discs into a stiff headwind. The Monster can fight some of the fiercest winds out there. We have not tested it in hurricane force winds... yet. The Monster is best suited for more advanced players.	Orc When the Orc hit the market, everybody had to have one. It was simply the longest disc available that blended accuracy with phenomenal distance. The Orc is our premier disc in terms of speed, accuracy and stability. Thrown flat, this disc will fly straight. Suitable for powerful throwers, but still manageable by beginners in lighter weights.	Starfire The Pro Starfire is a fast, dependable disc with a long straight flight and excellent glide. This disc can add measurable distance to your drives. With its quickness, slight high speed turn, long glide and low fade, the Pro Starfire will fly a long way.	Beast The Beast issued in the era of the wide rimmed driver. The wide, shallow rim allows for maximum speed on release and less friction across the underside of the disc, allowing for maximum distance. The Beast was an instant classic when it was released; giving players more distance using less power. It is suitable for beginners and pros alike.

SPEED 9		9 3 0 4		9 4 -1 2		9 4 -2 2		9 5 -3 1
	Firebird The Firebird is our most popular upwind distance driver. The Firebird's combination of superior speed and stability make it possible to throw drives into the wind with confidence. An excellent disc for throwing long range flex shots. A favorite of sidearm and overhead throwers, too. This disc is designed for professional level players.	Viking The Viking is one of our most versatile distance drivers from start to finish. The Viking is a long straight flyer with a very predictable fade at the end of the flight. This is an excellent disc for throwing both side arm and backhand shots due to its easy grip and neutral flight. The Viking is perfect for holding long, line drive shots as well as graceful left or right turning shots.	Valkyrie The Valkyrie is a World Record holding distance driver. It is an easy to learn disc, and in lighter weights will give newer players extra distance. Lighter weights also give players extreme range when thrown downwind, while maximum weights can give excellent upwind distance. The Valkyrie's high speed turn and flight path make it a great choice for long range turnover shots and rollers.	Sidewinder The Sidewinder is a fast flyer with a predictable high speed turn and lots of glide. This disc can add distance to anyone's drive, but is especially useful for those with less power. The Sidewinder is our best disc for long turnover shots and long distance rollers. Disc golfers who have never had success throwing roller shots, will be amazed at what they can make a Sidewinder do.

SPEED 8		8 6 -2 2		8 6 -4 1
	Dragon The Dragon is a lightweight distance driver with excellent glide for less powerful throwers who want to get more distance with less effort. Made in a special DX plastic with a great grip. The Dragon will float in water. Dragons are only available at 150 grams.	Archangel The Archangel is our easiest distance driver to throw for distance - especially for those with less power. The Archangel's high glide, fast speed and turning characteristic all combine to stretch out distance shots. The Archangel also doubles as an easy to turn roller disc. Lighter weights work great for younger players.

SPEED 7		7 3 0 3		7 5 0 2		7 4 -1 3		7 5 0 1
	Banshee The Banshee is a versatile and dependable overstable driver. It has a high degree of predictability, throw after throw. You can count on a Banshee to perform even into the wind. It is an excellent disc for sidearm, backhand and overhead throws, offering predictable, dependable flights.	TeeBird The TeeBird is one of our most accurate and reliable distance drivers. It has a combination of straight flight, high glide and good speed making it accurate and long flying both upwind and downwind. A popular choice for pros including 11-time World Champion and Hall-of-Famer Ken Climo. Great for accuracy, distance and sidearm.	Eagle The Eagle is our original, professional level distance driver. It ushered in a new era for distance and reliability. The Eagle's superior speed and predictable flight characteristics let you make confident and accurate long range power shots. The Eagle's high speed turn is excellent for power turn over shots.	TeeBird-L The TeeBird-L is the brother of the reliable TeeBird. The "L" stands for "Less Overstable" and "Longer". This disc has the same great speed and glide as the TeeBird, but is straighter flying with less fade at the end of the flight. If you are looking for a straight flying maximum distance driver in Pro Line Plastic, the TeeBird-L is the answer.

SPEED 6		6 3 +1 5		6 4 0 2		6 4 -2 2		6 5 -2 1
	Whippet The Whippet is a very overstable driver used for medium long left hooking shots. It holds a line extremely well even when thrown into stiff headwinds. Great for specialty shots like overheads, spike hizers, forehand rollers, hook thumbers and skip shots. Designed to handle the power of professional level players.	Gazelle The Gazelle is a great overall disc for players of all skill levels because of its versatility and control. It is a dependable driver that has a long straight flight with a predictable fade at the end. The Gazelle works well in headwind situations for both long and medium range shots. It has a narrow rim that is easy for smaller hands to grip.	Cheetah The Cheetah is a great driver for throwing straight long shots at any skill level. It is a very versatile disc that is predictably stable at lower speeds and will turnover slightly at higher speeds. It is an excellent disc choice for younger disc golfers	Leopard The Leopard should be everyone's first fairway driver as it has excellent glide and is easy to throw straight and far. The Leopard is a great turnover disc for players of all skill levels. The Leopard makes a dependable long range roller.

SPEED 5		5 4 +1 5		5 4 -1 2
	Viper The Viper is a stable to overstable disc that is very reliable in all wind conditions. The Viper changed the way Disc Golf is played by becoming the first disc used for the "Flex Shot". Excellent choice for sidearm throwers. Recommended for experienced players only.	Raven The Raven is a long range, straight flier with an excellent grip. It offers outstanding control and predictability on the fairway. Its large diameter makes it easier to throw than smaller diameter discs. The Raven is the longest range large diameter driver we make and it can double as a roller. Recommended for all skill levels.

Available Weights

DX Discs
Our DX discs are available in the widest weight range. From 150 class to maximum weight, DX models are available for every class of thrower.

Pro Line Discs
All Pro Line models are available from 165 to 175 grams. Some models are available at lower weights, including 150 class.

Champion Discs
Our Champion discs come in weights from 160-175 grams. 150 class is available in all Champion models except the Firebird and discs with speed ratings of 10.

Lighter weight discs are ideal for new players, women, and young players. Lighter discs are easier to throw flat for beginners, while heavier discs give power players increased stability.

How to use this chart

The INNOVA Driver Chart presents the basic flight characteristics of our drivers and can help you choose the disc that best suits your needs and ability. In many sports, players want the same equipment the pros use. In most cases that will work fine; however in Disc Golf there are stability variations in different disc models that must be taken into consideration.

Once you have thrown a driver listed on the Flight Chart, you can use that as a frame of reference, then this chart will become a valuable tool in understanding what to expect from our other driver models.

The discs are listed from the most understable on the right side of the chart, to the most overstable on the left, and the fastest models are at the top of the chart.

If you are just taking up the game, choose one of our more understable drivers listed on the right side of the chart. These discs will fly straighter with less effort and are easier to control in normal conditions. They are all excellent disc choices for those getting started, especially in lighter weights.

These discs provide maximum distance in tail-wind situations for players of all abilities.

The drivers listed in the center section of the Flight Chart are our stable flyers. These

stable drivers are our straightest flyers and perform well in most wind conditions. They are excellent choices for players of all skill levels, although newer players should choose lighter weights to get the best results.

Overstable discs are listed on the left side of the Flight Chart and are designed to fade back more noticeably at the end of the flight. They will resist turning over at the high speeds advanced players throw even into the wind. For newer players, these discs will not go straight for very long and are most useful on dogleg fairways, for sidearm and overhead shots and in windy situations.

	5	6	7	8	9	10		3	4	5	6	
SPEED	Speed — Speed is the ability of the disc to cut through the air. Speed ratings are listed up the left side of the page. Discs with higher numbers are faster. Faster discs go farther into the wind with less effort. Slower discs take more power to throw far, but have less chance to fly past the target.	9	4									
	Turn — High Speed Turn — This is the tendency of a disc to turn over or bank to the right (for RHBH throwers) during the initial part of the flight. A disc with a +1 rating is most resistant to turning over, while a -4 rating will turn the most. Discs rated -2 to -4 make good roller discs.	-1	3									
TURN	Turn — High Speed Turn — This is the tendency of a disc to turn over or bank to the right (for RHBH throwers) during the initial part of the flight. A disc with a +1 rating is most resistant to turning over, while a -4 rating will turn the most. Discs rated -2 to -4 make good roller discs.	+1	0	-1	-2	-3	-4					
	Turn — High Speed Turn — This is the tendency of a disc to turn over or bank to the right (for RHBH throwers) during the initial part of the flight. A disc with a +1 rating is most resistant to turning over, while a -4 rating will turn the most. Discs rated -2 to -4 make good roller discs.								5	4	3	2
GLIDE	Glide — Glide describes the property of the disc being able to maintain loft during flight. More glide is best for new players and for producing maximum distance, especially downwind. A disc rated 6 has the most glide. Beginners should choose discs with more glide.											
	Glide — Glide describes the property of the disc being able to maintain loft during flight. More glide is best for new players and for producing maximum distance, especially downwind. A disc rated 6 has the most glide. Beginners should choose discs with more glide.											
FADE	Fade — Low Speed Fade — At the end of the flight, all discs tail off (hook) to the left (for RHBH throwers) but some will hook harder than others. A disc rated 1 will finish straightest with very little fade (hook), while a disc rated 5 will hook hard at the end of the flight.											
	Fade — Low Speed Fade — At the end of the flight, all discs tail off (hook) to the left (for RHBH throwers) but some will hook harder than others. A disc rated 1 will finish straightest with very little fade (hook), while a disc rated 5 will hook hard at the end of the flight.
